WORK EXPERIENCE

Web Developer/Designer

September 2020 to December 2020

- This was a Mock Company for my School project
- Completely created and designed by myself, database stuff handled by 4 others

I Started the design by mocking it up in Adobe XD, and figured out how I could act on it. This was an Ecommerce site, so I had to come up with something simple, yet elegant, and still keep functionality.

- This was a website made from HTML/CSS, PHP, and some minor JS to help create the addition of items into the cart and add them into local storage
- This site taught me how budget out Time Management and what it's like to work on a strict deadline but still put out a solid product.
- This as well taught me what its like to work with a team, and what it means to take a role, and exceed at it.

Web Developer

January 2019 to June 2020

- This was another Mock Company for a personal project
- This site was mainly made of HTML and CSS, it was not very sophisticated.
- I as well mainly used this website for studying front end.
